

ACHIEVER LABORATORY INFORMATION MANAGEMENT SYSTEM

Powering Innovative Data Management in Agritech Laboratories

Efficiency and Compliance

FOR INTELLIGENT LABORATORY MANAGEMENT

In the rapidly evolving agricultural sector, the integration of technology is paramount to enhance productivity, ensure quality, and maintain compliance with regulatory standards.

Interactive Software's Laboratory Information Management System, Achiever LIMS, offers a comprehensive solution tailored specifically for the Agritech industry, streamlining laboratory operations and facilitating data-driven decision-making.

REDUCE ERRORS

**IMPROVE
DECISION
MAKING**

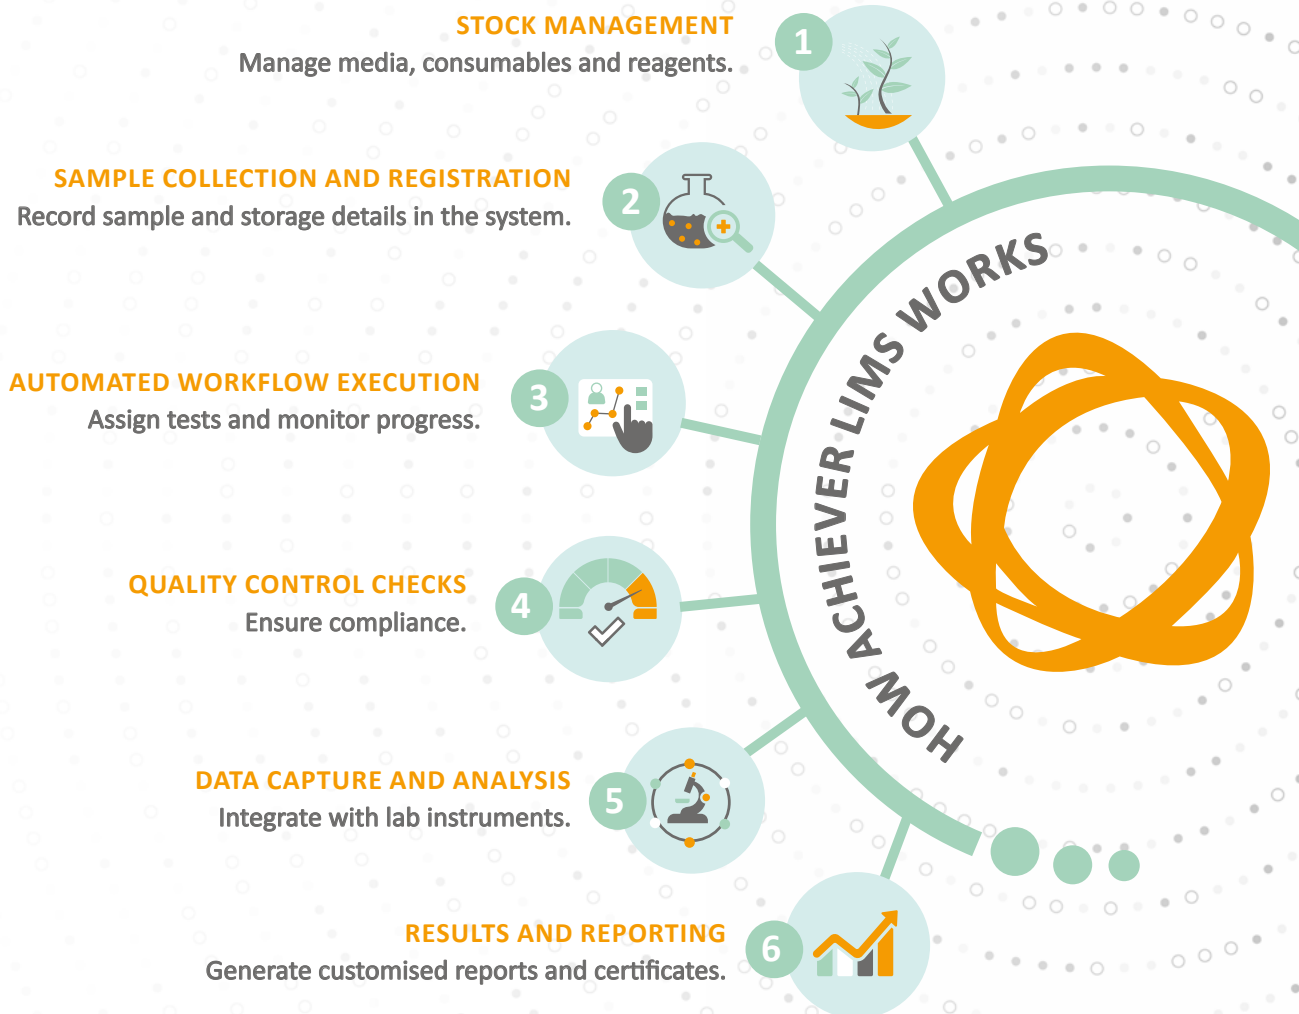

**INCREASE
EFFICIENCY**

**SUPPORT
REGULATORY
COMPLIANCE**

KEY BENEFITS

- **Dynamic, secure lab data** – Manage soil, feed, seed, dairy, and plant samples efficiently.
- **Drag-and-drop lab automation** – Support bespoke and complex lab processes for increased productivity.
- **Compliant by design** – Maintain industry requirements and regulatory standards.
- **Actionable analytics** – Standardise data entry and centralise reporting with quick access to results.
- **Centralised control** – Protect and control access to data and functionality.
- **API-driven connectivity** – Connect lab equipment, systems, and devices for seamless data transfer.
- **Intelligent audit ecosystem** – Ensure complete traceability and data integrity.
- **Operational efficiency and time savings** – Reduce data input time by up to 50%, freeing up time to focus on scientific work.

Optimising Lab Processes for Better Agricultural Outcomes

TROPIC CASE STUDY

Tropic, the biotechnology research company that works to develop healthier, hardier and more sustainable crop varieties using cutting-edge genetic innovation, has selected Interactive Software's Achiever LIMS to support their lab data and sample management.

The company focuses on making tropical agriculture more productive and sustainable, concentrating on key crops such as coffee, bananas and rice. Through their research, Tropic uses science to ensure these essential food crops are better suited to their tropical growing environment. This allows farmers to produce more food and have greater flexibility to overcome the increase of crop diseases brought on by climate change.

By implementing Achiever LIMS, the research team will be able to improve their data quality, consistency and handling. Achiever LIMS will also support and address any cybersecurity concerns.

Tropic

"The collaboration between Tropic and Interactive Software has raised the bar for supplier excellence. From the outset, Interactive Software demonstrated a deep understanding of our scientific and operational requirements, delivering a Laboratory Information Management System that is robust, adaptable and scalable. Their professionalism, responsiveness, and commitment to co-creation enabled a seamless implementation that has significantly enhanced our data integrity, regulatory compliance, and research efficiency. This partnership has laid a strong foundation for continued innovation and growth."

Dan Fox, VP Product Development, Tropic.

"Achiever LIMS has transformed our lab operations, reducing turnaround time and enhancing data accuracy."

Fabricio Minatel, Project Manager, Tropic

ABOUT INTERACTIVE SOFTWARE

Our goal is to help laboratories maximise the value of every sample. This means giving laboratorians and managers simple tools to record, search and analyse data, empowering them to locate samples within their inventory easily and use them effectively for their intended purpose.

For over 20 years we have been helping laboratories transform the way they work and deliver greater insight into their data through our configurable Laboratory Information Management System, Achiever LIMS.

Achiever LIMS manages the complete lifecycle of laboratory samples, elevating quality, ensuring compliance, and embedding best practice through robust and efficient workflows. Providing full traceability, Achiever LIMS delivers audit-ready evidence required for regulatory compliance and quality assurance.
