

ACHIEVER LABORATORY INFORMATION MANAGEMENT SYSTEM

Make every sample matter

Within the laboratory sector, the integration of technology is paramount to enhance productivity, ensure quality, and maintain compliance with regulatory standards.

Interactive Software's Laboratory Information Management System, Achiever LIMS, offers a comprehensive solution which streamlines laboratory operations and facilitates data-driven decision-making.

SYSTEM IMPLEMENTATION APPROACH

CORE IMPLEMENTATION PRINCIPLES

FOUNDATION-FIRST APPROACH:

We begin with Achiever LIMS' comprehensive out-of-the-box capabilities before addressing configuration requirements. This accelerates time-to-value while minimising implementation risk.

VALUE-DRIVEN CONFIGURATION:

Our focus centres on identifying and implementing changes that deliver measurable business outcomes, ensuring every modification contributes to your operational objectives.

IMPLEMENTATION METHODOLOGY

STAGE 1

FOUNDATION &
DISCOVERY

STAGE 2

SOLUTION DESIGN
& VALIDATION

STAGE 3

CONFIGURATION &
TESTING

STAGE 4

DEPLOYMENT &
ENABLEMENT

CONTINUOUS ENHANCEMENT

MODULAR EXPANSION
STRATEGIC SERVICES

SUPPORT STRUCTURE

ENHANCED SUPPORT PACKAGES

ONGOING PARTNERSHIP

TESTIMONIALS

The collaboration between Tropic and Interactive Software has raised the bar for supplier excellence. From the outset, Interactive Software demonstrated a deep understanding of our scientific and operational requirements, delivering a Laboratory Information Management System that is robust, adaptable and scalable. Their professionalism, responsiveness, and commitment to co-creation enabled a seamless implementation that has significantly enhanced our data integrity, regulatory compliance, and research efficiency. This partnership has laid a strong foundation for continued innovation and growth."

Dan Fox, VP Product Development, Tropic.

"It's been great, because it's been quite a long process. Interactive Software have shown patience. They've been accommodating when we've come back with queries and changes. We set out a plan at the start, but it's changed over the months, and they've been really accommodating. What's refreshing as well, because I do have previous experience of setting up of a LIMS system, is the people that we're working closely with, know that we are not all IT people and explain things in a language that we can all understand."

*Sam Wadge, Biobank Laboratory Manager,
TwinsUK, Kings College London*

"I think the simplest way to explain it is that the project wouldn't have been paperless without the support of Interactive Software and Achiever LIMS. Given the scale and complexity, it simply wouldn't have been feasible without their system."

*Nicole Maziere, LIMS Manager,
University of Liverpool*

"It's been a remarkable journey, but everyone has been so committed. There are times when I've said jump and the response from ISL has been how high? ISL has been fantastic to work with. The whole team has been pragmatic, proactive and dynamic in response."

*Lizzie Meadows, NRP Biorepository
Project Manager, Quadram Institute Bioscience, Norfolk and
Norwich University Hospital (NNUH)*

"Achiever LIMS has enabled the removing manual audit tasks and the automation of repetitive data entry which has created time for both clinicians and laboratory workers. This allows for more research and less concern about legislative compliance."

Chris Chambers, Leeds Teaching Hospitals NHS Trust

ABOUT INTERACTIVE SOFTWARE

Our goal is to help laboratories maximise the value of every sample. This means giving laboratorians and managers simple tools to record, search and analyse data, empowering them to locate samples within their inventory easily and use them effectively for their intended purpose.

For over 20 years we have been helping laboratories transform the way they work and deliver greater insight into their data through our configurable Laboratory Information Management System, Achiever LIMS.

Achiever LIMS manages the complete lifecycle of laboratory samples, elevating quality, ensuring compliance, and embedding best practice through robust and efficient workflows. Providing full traceability, Achiever LIMS delivers audit-ready evidence required for regulatory compliance and quality assurance.
