

FROM SPREADSHEETS TO SMART DATA MANAGEMENT:

Transforming laboratory operations with Achiever LIMS

Laboratories today face unprecedented data challenges. As research scales and compliance demands grow, managing data through spreadsheets becomes inefficient, inconsistent, and risky. Information silos, manual errors, and version confusion all stand in the way of scientific productivity.

CHOOSING DATA MANAGEMENT SYSTEMS FOR YOUR LAB

Interactive Software's Achiever LIMS offers a comprehensive Laboratory Information Management System designed to streamline laboratory operations, improve data integrity, and provide a solid foundation for growth. With over 20 years' experience supporting laboratories and research institutes, Interactive Software helps organisations move confidently from spreadsheets to a centralised, compliant, and efficient data management platform.

WHY MOVE FROM SPREADSHEETS TO A LIMS?

The limitations of spreadsheet-based systems are clear: they depend on manual input, restrict collaboration, and make audit readiness a challenge. Achiever LIMS replaces these challenges with structured, secure, and automated processes that empower laboratory teams to focus on science - not administration.

ACHIEVER LIMS ENABLES LABORATORIES TO:

- **Eliminate duplication and manual errors.** Replace disconnected, inaccurate spreadsheets with validated data entry and automated workflows.
- **Increase efficiency.** Streamline processes through real-time data capture, freeing scientists and technicians from repetitive input.
- **Ensure data integrity and traceability.** Every action is logged and every record linked, ensuring data is complete, consistent, and compliant.
- **Enhance visibility and decision-making.** Achiever's dashboards and analytics offer instant insights across operations, projects, and research progress.
- **Support compliance with confidence.** Achiever LIMS provides built-in frameworks for regulatory alignment and full audit traceability.

"Achiever LIMS has automated repetitive data entry, freeing time for both clinicians and laboratory workers."

*Chris Chambers, Leeds Teaching Hospitals
NHS Trust*

YOUR DATA, ORGANISED AND ACTIONABLE

Achiever LIMS manages the complete lifecycle of laboratory samples, from collection and analysis through to storage and reporting. It elevates quality, embeds best practice, and provides the audit-ready evidence required for regulatory compliance and accreditation.

Achiever LIMS is trusted by research institutions, agritech, biobanks, and clinical laboratories across the UK. It's proven to deliver measurable improvements in efficiency, traceability, and compliance, all while simplifying day-to-day operations.
